

[illegible]

Figure 1: Typical Section Details of Aluminum Extrusions. The figure shows three cross-sectional views of aluminum extrusions labeled F, NG, and AL1 (ALUMINUM). Each view includes dimensions and references to "SEE SCHEDULE".

- View F:** A simple rectangular profile. The vertical dimension is labeled "SEE SCHEDULE".
- View NG:** A profile with a central rectangular section and a flange. The vertical dimension is labeled "SEE SCHEDULE". The flange height is labeled "HINGE SIDE". The flange width is labeled "2'-10\"". The central section has a width of "7 3/8\"". The flange has a thickness of "6 3/4\"". The base width is labeled "3'-4 5/8\"". A "G2" label is present in the central section.
- View AL1 (ALUMINUM):** A profile with a central rectangular section and a flange. The vertical dimension is labeled "SEE SCHEDULE". The flange height is labeled "5\"". The flange width is labeled "1'-0\"". The base width is labeled "3'-4 5/8\"". A "G2" label is present in the central section.

A note at the bottom right indicates "1/8\" MIN.".

The image contains two technical drawings of window units. The left drawing is labeled '10'-4"' at the top and shows a unit with a total width of 10 feet 4 inches and a total height of 6 feet 10 inches. It features three vertical panes, each labeled 'G1' in the center and 'G3' at the top and bottom. The panes are separated by 2-inch muntins. The unit has a 6-inch corner on the right side and a 10-inch top section. The right drawing is labeled '13'-7"' at the top and shows a unit with a total width of 13 feet 7 inches and a total height of 6 feet 10 inches. It features four vertical panes, each labeled 'G1' in the center and 'G3' at the top and bottom. The panes are separated by 2-inch muntins. The unit has a 6-inch corner on the right side and a 10-inch top section. Both drawings include dimension lines and arrows indicating measurements.

SCALE: 1/4" = 1'-0"

Diagram showing the elevation view of a window assembly. The window is labeled "G2" and is set within a frame. Dimensions are indicated: 5'-4" for the total width, 2'-5" for the width of each pane, and 7'-10" A.F.F. for the height. The window is set into a wall with a total thickness of 10'-0". The window frame is 2" thick. The wall is 2" thick. The window is set into the wall with a 2" gap on the left and a 2" gap on the right. The window is set into the wall with a 2" gap on the left and a 2" gap on the right.
